Abstract

College Choice Responsive website is completely based on user they can visit the website and can get all the information regarding the specific college. They can also compare college on the basis of different domains. This website helps user for selecting college and contact to them. The main section in this websites are college section where we can get detailed information about any college and the comparison page where we can compare the different colleges. With the help of this website customers can get precise information and can select their dream college after getting the relevant information about it and comparing it with other college. This will help lot of people to know about their college in which they want to get admission.

It can compare college through which we can have a clear view on expenditure of fees, regarding placement and academic details. So overall CollegeChoice is the platform where student can have more exposure of different college and can choose the best college for them according to the domains they set.

Introduction

Decision making is one of the most important aspect of our life and it can affect our whole future. Choices we make regarding the college selection can sometimes prove to be wrong and may cost you for the whole life and future. But if we have right information based on college campus, fees, reviews, academic details and many more also if we can compare college on these aspect can help us to make a right decision and select right college for future. CollegeChoice is our website which can solve this problem and provide us with all the basic information as well as choices of college through which we can select our dream college and can make most of it. It can compare college through which we can have a clear view on expenditure of fees, regarding placement and academic details. So overall CollegeChoice is the platform where student can have more exposure of different college and can choose the best college for them according to the domains they set.

About College Choice : -

- Consist of different colleges
- People can compare different colleges on and make their reasonable choice
- Consists of all information like fee structure , infrastructure and many more regarding colleges

Area of Web Development

A website regarding college will help all the student to know about the latest information regarding their dream college and they can compare college through which we can have a clear view on expenditure of fees, regarding placement and academic details. Student don't have to go anywhere, they can now get the full information regarding their dream company by sitting at one place.

1.3 Hardware Requirements

- Memory [2GB RAM (or higher)]

1.3 Software requirements

- MS Visual Studio Code (Editor)
- Any OS
- Figma (designing layout)
- Web Brower
- XAMPP

Objective

Choices we make regarding the college selection can sometimes prove to be wrong and may cost you for the whole life and future. But if we have right information based on college campus, fees, reviews, academic details and many more also if we can compare college on these aspect can help us to make a right decision and select right college for future.

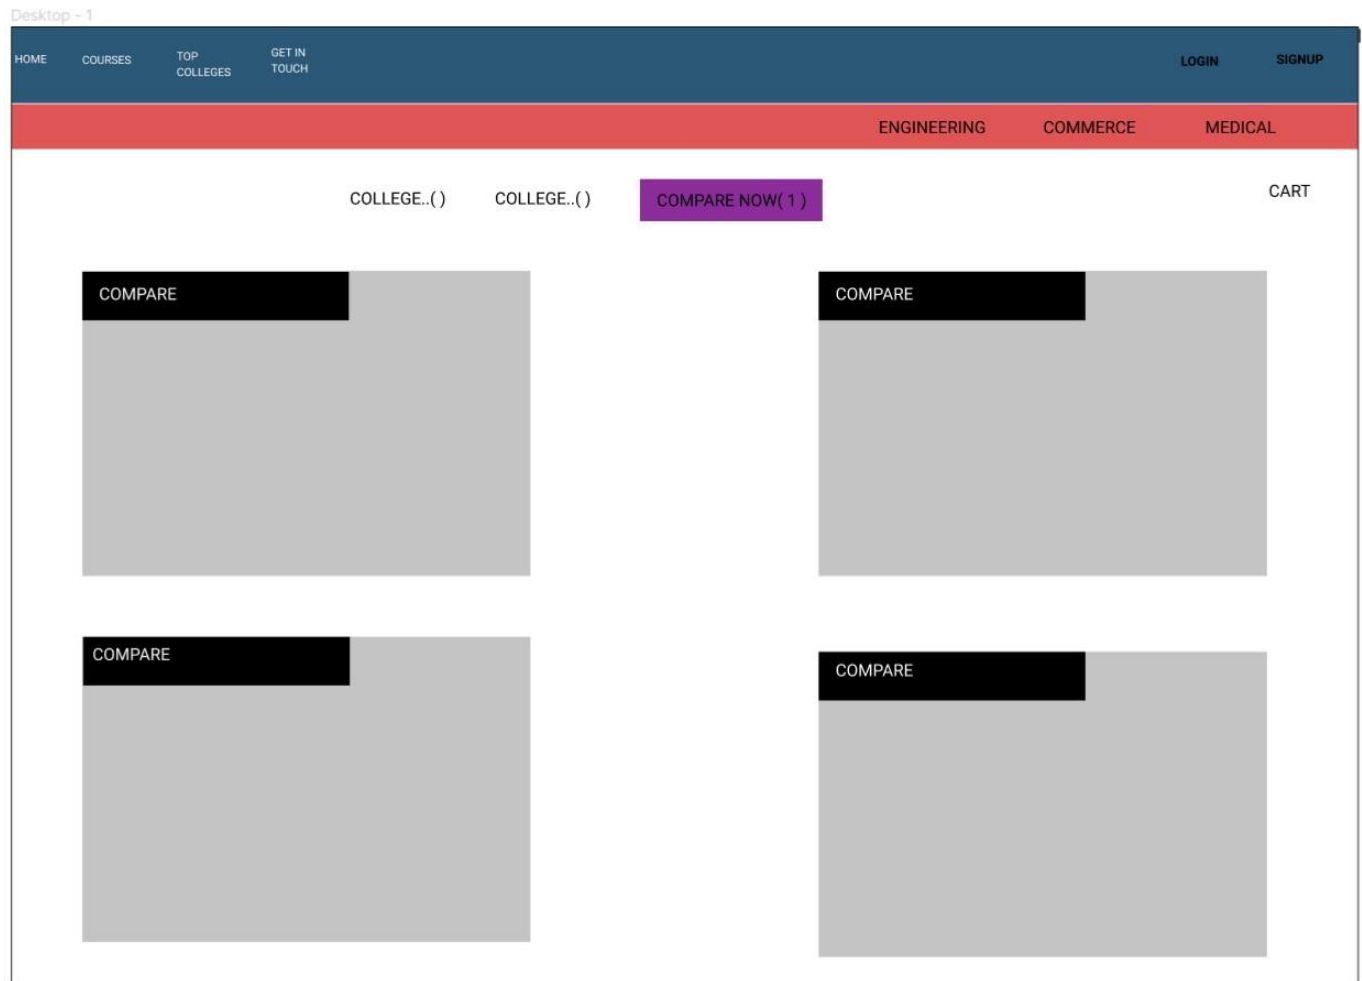

College Choice is our website which can solve this problem and provide us with all the basic information as well as choices of college through which we can select our dream college and can make most of it. It can compare college through which we can have a clear view on expenditure of fees, regarding placement and academic details.

Reason for choosing this topic is to provide all students with the platform where they can have information regarding college, can compare and choose them according to their skills and need. This website will not only let student to know about the details to get admission but also about the academic infrastructure and many more.

Implementation Details

Part1: we will create the frontend portion which involves the home page and some other linking page. Along with that we will add navigation bar through which we can have access to all the pages.

At the same time we will make it responsive and more interactive. We will be focusing more on designing part and try to make it user friendly which can be accessed by all.

(Layout Design)

Part 2: After the designing of the website we will built our comparison page where we can compare college and that to will be responsive and the major portion of the project. We compare college on the basis of their fees, placements, reviews, seats, courses and other details.

Part 3: Collection of college data and creation of backend using mySQL and deploy them in localhost php MyAdmin

Part 4: At last we will give some final touch with recommendations. In this way user can have a basic idea about taking admission in college. Then we will test our website on different devices and fix if some bugs which occur during responsiveness.

Progress

1.) Part 1 is completed

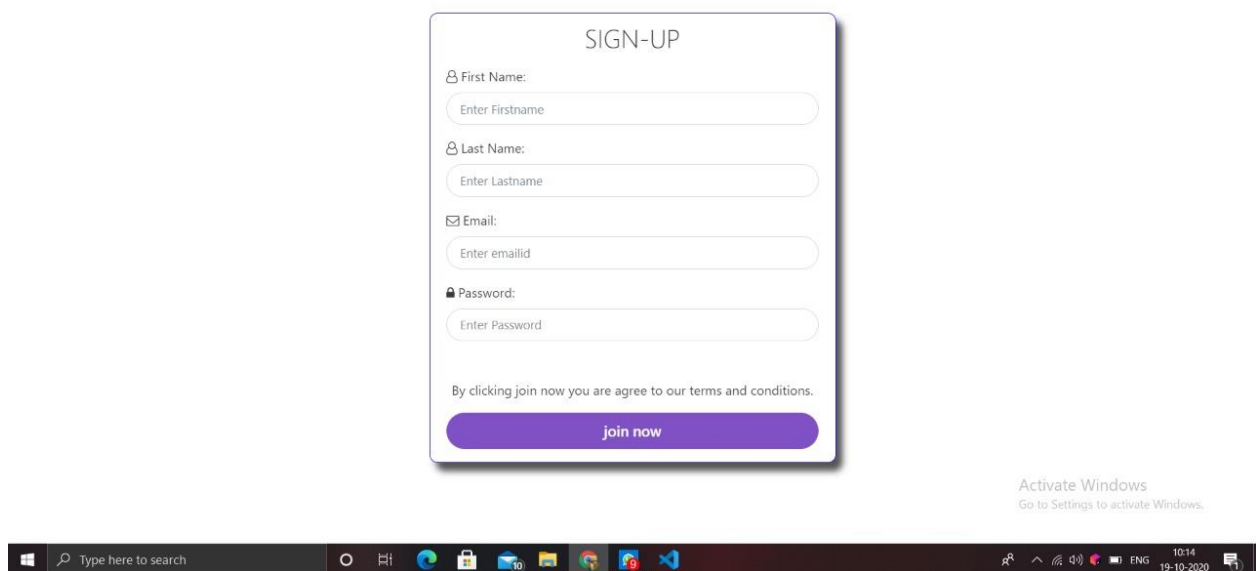

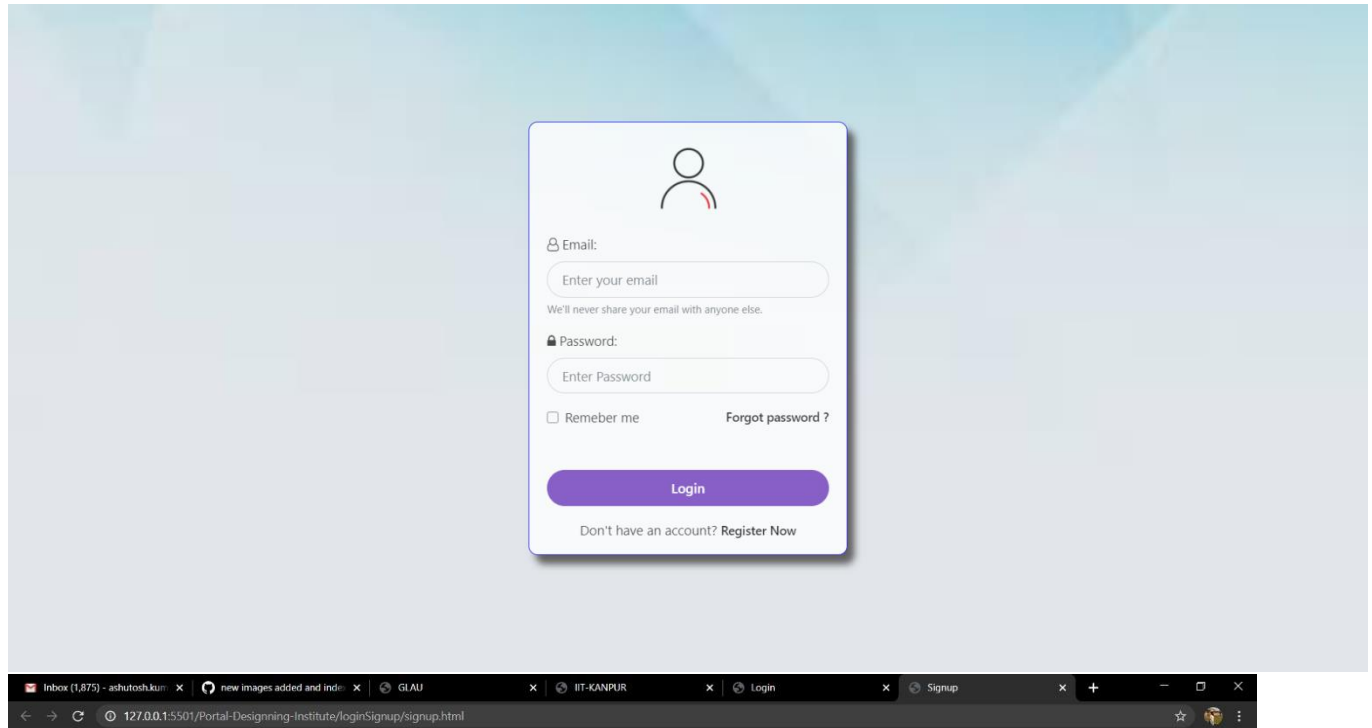

- Landing page
- Home page
- Login and sign up
- Prepare the Fabric client node and enroll an identity
- College Template for all the colleges
- Creating database for user information
- Storing data in user database during sign up

2.) Part 2 is completed

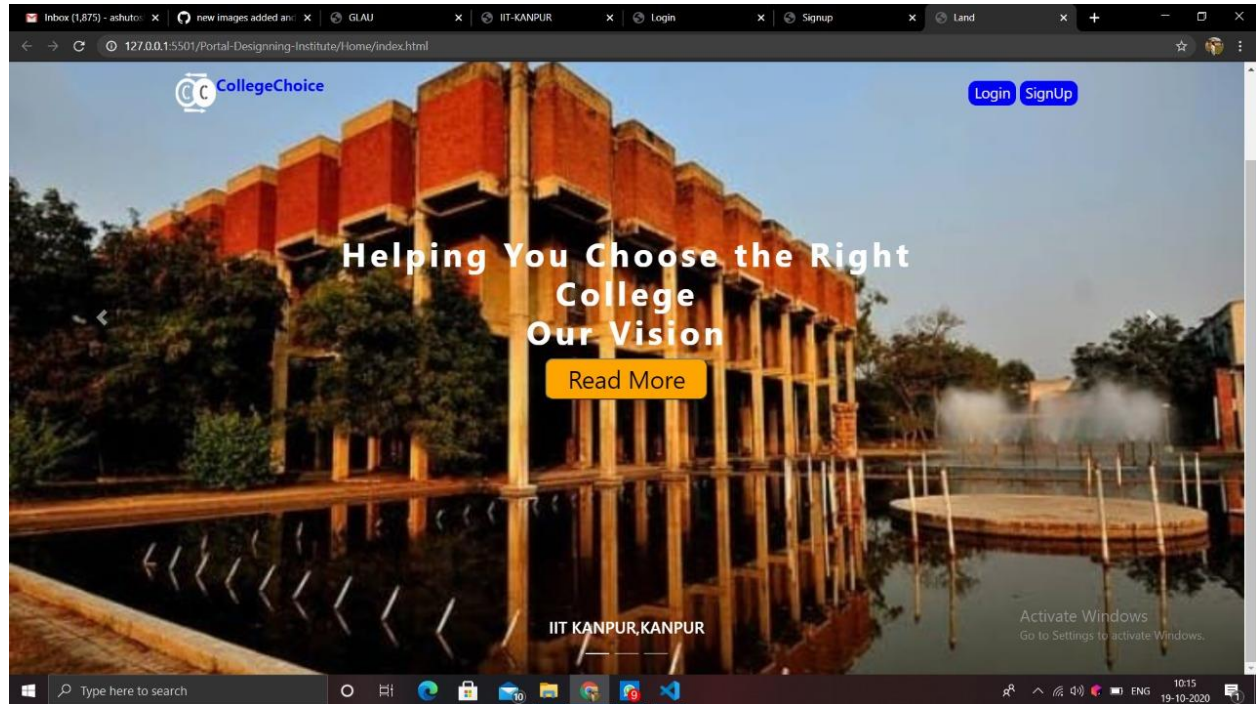

- Creating cart for all the colleges
- Creating a database
- Linking the database with the cart
- Comparison Page
- Linking Database to the comparison page

B.Tech/BE (Bachelour Of Technology)

The top engineering colleges in Uttar Pradesh have been ranked by many ranking agencies in India like NIRF, Outlook, The Week, etc. There are 27 public and 434 private engineering colleges in Uttar Pradesh.

- Some of the top colleges in the state for engineering include IIT Kanpur, IIT BHU Varanasi, Aligarh Muslim University, and JIIT Noida.
- There are 411 B.Tech and 203 M.Tech colleges in Uttar Pradesh. Some colleges also offer PhD and MPhil in engineering degrees.
- There is a Health Centre located on the campus of IIT Kanpur. The medical staff is well trained and is always prepared to attend to the medical needs of the students, faculty and staff on campus.
- Admissions in these colleges are done through common engineering entrance exams like JEE Main, UPSEE, JEEUP, GATE, etc.
- The average fee of top engineering colleges in Uttar Pradesh for B.Tech is INR 1,00,000-3,00,000 per year and INR 50,000-2,00,000 per year for M.Tech.

Descriptive

About the Cask

Indian Institute of Technology (IIT) Bombay (also known as IIT Bombay) is a public engineering institution located in Mumbai, India. It was founded in 1958 as the Bombay Engineering College. IIT Bombay is one of the seven Indian Institutes of Technology (IITs) established by the Government of India. It is a member of the Association of Indian Universities (AIU) and the Association of South East Asian Universities (ASEAN). IIT Bombay is a member of the Association of Indian Universities (AIU) and the Association of South East Asian Universities (ASEAN). IIT Bombay is a member of the Association of Indian Universities (AIU) and the Association of South East Asian Universities (ASEAN).

IIT BHU Faculty

IIT BHU Faculty
Indian Institute of Technology (IIT) BHU has a large, diverse and highly qualified faculty of 400 members. Each and every member of the faculty is with 10-20 years of their respective disciplines and, as members, are experienced and have gained success at IIT BHU. They are always available to students for clarification of doubts and concepts related to the syllabus and outside. The student to faculty ratio at IIT BHU is 15:30.
The faculty at IIT BHU consists of the Dean, Professors, assistant Professors and Associate Professors. Various members are recipients of prestigious awards like Padma Shri, Arjuna Award, Shanti Swarup Bhatnagar Award, Humboldt Research Award and several others.

III T BHU Placements

The feeding and placement call of the male's sexual activities such as preincubation talks, water talks, rock movements, nestmate and mate. It also serves to attract placement effect on complex. Some of the frequent structures of the male include learning (female dark songs) (male song) (dark song), J.F. Morgan, Arnold and more.

OT Karpu Placement 2020 Highlights

IT RHL Facility

Intercollegiate Technology (IT) Park has a spacious and well-furnished campus that spreads across an immense area of 1000 acres. The entire campus is neatly laid out and provides for the academic and recreational needs of its students.

- **Model 1:** The 1000 mg/kg body weight of the students is about a 10-fold difference from the average body weight. Therefore, the variability in the body weight of the students is important. There are no important toxicokinetic or toxicodynamic data available for variability through other exposure routes.
- **Species:** There are various species for which available information is present: a rabbit, a beagle dog, a rat, a guinea pig, and an experimental pig. The rat is the most relevant species for the assessment of the risk of the chemical.
- **Health status:** There is no specific information on the health status of the rat. The median status of a rat is always compared to the rat in the medical record of the student's faculty and staff in general.
- **Route:** Apart from the ingestion route, there are routes of contact and contact with the surface, including the dermal and respiratory routes. The ingestion route is the most relevant route of exposure.
- **Exposure:** There are a number of total doses of approximately 100 mg/kg and also a number of daily requirements of between approximately 10 mg/kg and 100 mg/kg.

Century's capital budget. Century's assets are not perfectly random, but it has made a series of classical capital decisions from 1970-2000, making over 2000 assets and financial decisions, a 40-year portfolio of managerial capital budgeting. Century College is trying to improve the quality of its own internal capital budgeting, considering that a capital budget is a strategic, long-range plan that lists the idea of the use of financial resources, documents, and identifies the source of capital (from loans from banks).

Answer: ☐ A ☒ B ☐ C ☐ D

Correct Answer: B

It is a well-established fact that a reader will be distracted by the irrelevant content of a page when looking at its layout. The point of using Content Sense is that this will allow a normal distribution of values, as opposed to using Content Sense content here, making it hard to read (English).

7) Database for Users:

The screenshot displays the phpMyAdmin web interface. The main window shows the 'users' table within the 'college' database. The table structure is as follows:

S.no	Fullname	Email	Number	Password	Date/Time
13	Kaushik Dutta	kaushikdutta@gmail.com	2147483647	23441hha	2020-10-19 10:31:39
14	raahul singh	raahul@rediffmail.com	23732973	kfkakafa	2020-10-19 10:32:02
15	Mayank singh	mayank@yahoo.com	92393287	ksdkhkas	2020-10-19 10:32:20
16	sheetal garg	sheetal123@gmail.com	237237777	sh223445	2020-10-19 10:32:47

The interface includes a sidebar on the left with a tree view of databases and tables. The main area has tabs for 'Browse', 'Structure', 'SQL', 'Search', 'Insert', 'Export', 'Import', 'Privileges', 'Operations', 'Tracking', and 'Triggers'. Below the table, there are options to 'Check all', 'With selected', 'Edit', 'Copy', 'Delete', and 'Export'. A 'Query results operations' section contains 'Print', 'Copy to clipboard', 'Export', 'Display chart', and 'Create view'. At the bottom, there is a 'Bookmark this SQL query' section with a 'Label' input field and a checkbox 'Let every user access this bookmark'. A 'Console' tab is visible at the very bottom.
